REMOVAL OF DEPOSITS FROM COPYRIGHT OFFICE

NOTICE is given to authors, copyright proprietors and other lawful claimants that they may claim and remove before January 1, 1955, any article of the following named classes of published works deposited for copyright between January 1, 1951, and January 1, 1952, not reserved or disposed of as provided by sections 213 and 214 of Title 17 of the United States Code and still remaining in the files of the Copyright Office at the time of the request for their removal. The classes of published works covered by this notice are:

Books and Pamphlets.
Contributions to periodicals.
Works of art; models or designs for works of art.
Reproductions of a work of art.
Drawings or plastic works of a scientific or technical character.
Photographs.
Prints and pictorial illustrations excluding prints or labels used for articles of merchandise.

Other published works and all unpublished works are excluded from this notice.

The request for the removal of any copyright deposit should be signed by the person entitled thereto or his duly authorized agent. Such request should identify the work by stating the title, author, copyright proprietor, registration number and year of deposit, and should be addressed to the Copyright Office, Library of Congress, Washington 25, D. C.

L. C. card, 6-35347

This number identifies the Library of Congress printed card for the complete series of the Catalog of Copyright Entries.

For sale by the Register of Copyrights, Library of Congress, Washington 25, D. C. Price for this part: $1.50 per issue, $3.00 per year.

PREFACE

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code.* Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Each annual volume is subdivided to represent the classes of material listed in section 5 of Title 17 of the *United States Code.* The table at the end of this preface shows the organization of the *Catalog*, together with a brief listing of the materials principally contained in each part, the symbols used to distinguish the materials, and the prices of semiannual issues and of the annual subscription to the complete *Catalog*.

Each copyright registration listed in the *Catalog* is recorded in a main entry, which includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, the copyright date, the copyright registration number, etc.). Cross-references, and, in some cases, indexes, are provided.

The name of the copyright claimant in each entry is that given in the application for registration. Available information in the records of the Copyright Office relating to subsequent changes of ownership can be obtained upon request and upon payment to the Register of Copyrights of the fee specified in the law for the conduct of a search of the records.

In the case of each registration listed, except for renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of Title 17 of the *United States Code*, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) of the regulations of the Copyright Office, published in the Code of Federal Regulations, 1949 Edition, which provides for the deposit of identifying reproductions in lieu of the work itself. To distinguish foreign works, for which two copies have been deposited under section 215 of Title 17 of the *United States Code*, a zero immediately following the class symbol in the registration number has been used.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the *Register of Copyrights*.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

HOW TO USE THE CATALOG OF COPYRIGHT ENTRIES, PART 1B

Works registered in the Copyright Office in Class A, Books, are divided between Part 1A, *Books*, and Part 1B, *Pamphlets, Serials, and Contributions to Periodicals*, with the exception of greeting cards, which are listed in Parts 7–11A.

Part 1A lists domestic and foreign monographs published in either book or pamphlet form which have been selected for the general collections of the Library of Congress. All other works registered in Class A are listed in Part 1B. These are predominantly of a pamphlet or serial nature. Among the pamphlets are included reports, surveys, manuals, instruction books, and tests, as well as other monographic works in all subject fields. Typical of the serial material are yearbooks, directories, trade catalogs, and commercial, industrial, and legal services, in either loose-leaf or pamphlet form. Contributions to periodicals, registered in Class B under the symbol B5 are also included in Part 1B. Renewal registrations of works originally registered in Class A are listed in Part 1A, renewal registrations of contributions to periodicals in Part 1B. Each registration is described in a main entry, and cross-references are provided to facilitate the location of the main entries.

Part 1B, *Pamphlets, Serials, and Contributions to Periodicals*, consists of two sections, the first listing entries for works currently registered, the second, renewal registrations for contributions to periodicals. Each list is arranged alphabetically under the names or titles appearing at the beginning of the entries. Interfiled with the main entries are cross-reference entries beginning with other names or titles for which a searcher might look; in each case, the cross-reference refers the searcher to the name or title under which the main entry can be found. Main entries are usually listed under the names of the persons or corporate bodies principally responsible for the content of the works (author, editor, compiler, etc.), but in some instances, particularly in the case of serial publications, they are listed under the titles of the works. Cross-references cover titles and significant names given in the main entries, including those of the claimants, or, in the case of renewal registrations, the renewal claimants.

Each main entry for currently registered monographic works includes, in addition to the name or title used as the heading, the following information descriptive of the work, if available and applicable:

1) Title.
2) Names of other persons associated with the creation of the work (joint authors named in both the application and the work, editors, translators, etc.).
3) Edition statement.
4) Imprint, consisting of the place of publication, name of publisher, and date of publication (the name of the publisher is omitted from the imprint when the publisher and the heading are the same).
5) Collation, consisting of the number of pages or number of volumes, if more than one, and the abbreviation, "illus.," to indicate illustrative matter (briefer items or works of a special character are described by the use of such terms as "sheet," "folder," etc.).
6) Series title.
7) Names of authors given in the application which do not appear elsewhere in the entry.
8) Name of the employer in the case of a work made for hire, if so named in the application, together with the names of the employees.
9) Information contained in the application which relates to the registration of an earlier version of the work.

Main entries for serial publications contain the same information as those for monographs with the exception of the items relating to paging and illustrations, which are not included. Issue numbers, issue dates, and issue titles are tabulated under the general description of a serial.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes the following:

1) A brief statement of the new matter on which copyright is based when this information is given in the application.
2) Name of the copyright claimant.
3) Date of publication as given in the application.
4) Registration number.

In serial entries, the publication date and registration number of each issue, preceded by the copyright symbol, appear in the tabulation of the issues.

An explanatory note is added to the main entry when it is necessary to indicate variations in information which relates to the publication date or the name of the claimant as given in the application and the copy of the work. For ad interim works, the date the work was deposited in the Copyright Office, preceded by the abbreviation, "1c," or "2c," is given following the date of publication in the statement relating to the claim of copyright.

For renewal registrations the main entry includes, in addition to the heading, the following:

1) Title.
2) The subtitles or installment numbers.
3) Names of joint authors, illustrators, editors, compilers, and translators.
4) A note giving the title and issue date of the periodical in which the contribution appears.

The information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes the following:

1) A brief statement of the new matter on which the original copyright was claimed, if available in the renewal application or the records of the Copyright Office.
2) Date of original-copyright.
3) Original registration number.
4) Renewal registration number.
5) Date of the receipt of the renewal application.
6) Name of the renewal claimant followed by an abbreviation in parentheses representing the claimant's statement of the basis of his renewal claim—e. g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
